

# Secure File Sharing

From the #1 Email Security Provider

Large File Share | Advanced Message Control | E-signature | Secure File Transfer

*Share large files without taxing infrastructure*

## Benefits:

- Meet regulatory requirements such as HIPAA, GLBA, E-SIGN, and more
- Bolster customer trust with encryption and branding
- Save time configuring to the business' needs with simple management and support
- Full tracking visibility and rights management
- Send multiple large files simultaneously

## Customer Ecosystem:

- 90,000+ customers from large enterprise to small business
- Companies with Microsoft 365, On-prem Exchange, and G-Suite
- All federal financial institutions Examination Council (FFIEC) regulators
- U.S. Securities and Exchange Commission (SEC)
- 30% of U.S. banks
- 1,200+ U.S. hospitals
- 30+ Blue Cross Blue Shield (BCBS) plans

Files are growing larger, but email provider limits are staying the same—most, around 25MB. Without a simple system that permits employees to share files easily, you encourage what Economists call deadweight loss—employees find unsecure workarounds, and everyone loses.

## How it works

Secure File Sharing makes it simple for users to send large attachments electronically—up to 100GB in size—securely. Plus, you can recall files, enforce rights management, and append legally binding e-signatures. The future of work will only include more sharing. Limit your liability now and train employees to use simple, sanctioned systems, creating more efficiency with better solutions and less effort.

As an integral part of Secure Cloud, Secure File Sharing works seamlessly with other Security, Compliance, and Productivity services in our Secure Suite. Together, they form a fully integrated platform that allows partners and customers to create a secure, modern workplace.

Send large files (100 GB) through Outlook or Secure Portal

Full tracking visibility with rights management of shared files

Request a legally-binding electronic signature within the document

# Why Secure File Sharing?

- No infrastructure investment, simple integration into existing mailbox and other communications channels
- Avoid loss of productivity associated with recipient's inbox size restrictions
- Centrally controlled, cloud-based solution that works with your current infrastructure and process
- Allows easy file sharing that still meets compliance requirements
- Simple to manage and support with Secure Cloud
