Ouray Sportswear Improves Security, Saves Time and Money with Webroot[®]

Background

Ouray Sportswear, LLC is an apparel manufacturing company based in Englewood, Colorado. The company employs over 180 people and is a provider of custom sportswear to all manner of organizations, from colleges and companies to resorts. The company uses the latest printing techniques to deliver top quality products to their customers.

The Challenge

Ouray had been using a well-known traditional endpoint security solution to protect their systems and back up their data, but over time they found that it was slowing down machines and causing disruptions to the production environment. Server space began to run

out, and thus the older software was actually removed from critical servers to create space. Ouray was forced to make a choice between security and efficiency; a choice that no business should ever have to make.

It was clear that having no security at all was not an option. If the company was to continue providing its top-notch service, its servers had to be totally protected from any possible cyber-attacks.

The Solution

Ouray's IT Specialist, Geomar Morales, knew he needed to find a solution that provided the protection they needed without being a major drain on their systems. He began researching and testing multiple security solutions, looking for one that was lightweight, effective, and easy to deploy and manage. Morales found that Webroot stood out clearly from the competition.

"Not only is the client extremely lightweight, it was not a resource hog. I can run 100 scans on our main production server and have no issues in regards to the servers slowing down. The online user interface also makes it very simple to control and see what is going on with our network and PCs. I love knowing immediately when a virus has infected one of our PCs, letting me isolate the issue right away. Webroot has definitely won me as a lifelong customer!"

Geomar Morales, IT Specialist at Ouray Sportswear

Results

Morales deployed Webroot SecureAnywhere® Business Endpoint Protection across their network and immediately saw a significant improvement over their previous solution. Whereas before, scans had taken a great deal of time and had caused issues to the overall performance of the company's systems, the light and effective Webroot solution could run scans on Ouray's main production server without any slowdown at all. Its instantaneous cloud-predictive malware protection and notification system enabled Morales to easily monitor and remediate any infections that might get through, all through an easy-to-use online console.

"The notification system has also been a blessing. It's awesome to know exactly when a PC is infected, so we can stop the intrusion before it infects the rest of our server."

Geomar Morales, IT Specialist at Ouray Sportswear

In addition to the improved performance and protection offered by Webroot, Ouray has saved money and time on security for the company. They have also had a great experience with the friendly and knowledgeable support teams at Webroot, who were always on standby to assist if needed. All of this has allowed Morales to feel confident that Ouray's network is in good hands, and the company's staff can focus on providing the best service possible to their customers.

About Webroot

Webroot was the first to harness the cloud and artificial intelligence to protect businesses and individuals against cyber threats. We provide the number one security solution for managed service providers and small businesses, who rely on Webroot for endpoint protection, network protection, and security awareness training. Webroot BrightCloud® Threat Intelligence Services are used by market leading companies like Cisco, F5 Networks, Citrix, Aruba, Palo Alto Networks, A10 Networks, and more. Leveraging the power of machine learning to protect millions of businesses and individuals, Webroot secures the connected world. Headquartered in Colorado, Webroot operates globally across North America, Europe, and Asia. Discover Smarter Cybersecurity® solutions at webroot.com.
