# Innovative Cybersecurity Management for MSPs

Webroot and Pulseway have partnered to bring MSPs the cybersecurity industry's most innovative suite of endpoint, network, and user protection technology, all managed by one of the most user-friendly and accessible RMMs on the market. Now, you can instantly configure and monitor protection across your entire user base, from anywhere.

This Pulseway integration delivers:

» **Complete Endpoint, Network, and User Protection**
The full array of Webroot cybersecurity is now available with Pulseway, including SecureAnywhere® Business Endpoint Protection, DNS Protection, and Webroot® Security Awareness Training.

» **Streamlined management**
View and manage your entire install base and licenses from a single-pane-of-glass dashboard.

» **Mobile-ready RMM for convenient management**
Manage industry-leading endpoint protection from anywhere you have signal.

» **Powerful remote administration**
Remote commands let you deploy agents, apply policies, scan endpoints, clean up threats, and more from the console.

» **Automated, custom reporting and alerting**
Pulseway's highly configurable reporting and alerting lets you schedule custom reports to suit your business' needs.

» **Flexible, no-commitment licensing options**
Our licensing plans are tailored so MSPs can scale coverage as their business grows, without making you wait for a sales call.

» **Instant free trials**
Visit your Pulseway Antivirus tab to see Webroot SecureAnywhere Business Endpoint Protection to try before you buy.

Mobile Mgmt Interface

Benefits of Using Webroot with Pulseway

» **Cloud-based architecture**
Provides fully remote access and without on-premises hardware

» **Pulseway integration**
Unifies and further improves ease of administration

» **Highly effective protection**
Minimizes support/help desk calls

» **Automated roll-back remediation**
Makes reimaging local drives a thing of the past

» **Zero definitions or signature updates**
Always up to date to ensure protection

» **Low device footprint**
<2 MB agent with zero definition files, so clients are protected without compromising performance

» **Intuitive, automated management**
Reduces administration resource requirements

» **Installs in 33 seconds[†]**
Deploys with ease

» **No-conflict agent**
Enables secure solution migration or layered protection

» **Remote agent commands**
Offers full control over individual or groups of endpoints

» **Hierarchical polices and enforcement**
Provides global, site, user group, and user level administration
