Can you protect your clients from social engineering?

Why are your clients being targeted?

Personal devices used for work

37% of global office workers use both personal devices for work and work devices for personal matters. 

Unsecured home routers

62% increase in sensitive data accessed from home-owned devices in the first six months of 2020.

Personal info posted to social media

$3.25B billion earned annually by global cybercriminals using social media-enabled tactics.

How do you stop social engineering?

Clients relying on a single layer of protection are more vulnerable

#1 cause of breaches:
Social Engineering

Protect your clients and your business from social engineering with Carbonite + Webroot.
