WEBROOT®
Smarter Cybersecurity™
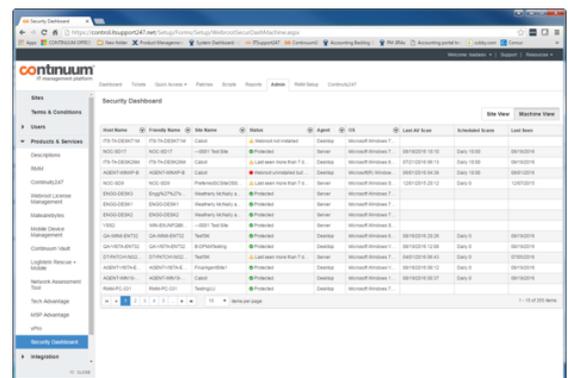

and

continuum®
IT management platform

Grow Your Business with Smarter Endpoint Protection

With the Continuum and Webroot integration, you can seamlessly manage and protect your clients' endpoints through the Continuum IT Support Portal, enabling you to grow your business profitably and securely, while providing the best possible service to your clients.

This Continuum integration delivers:

» **Seamless deployment**
Deploy to all your endpoints through the Continuum IT Support Portal

» **Continuous monitoring**
Easy access to device status through a security dashboard

» **Alerting**
Detect when Webroot protection is removed or uninstalled by a user

» **Automated policy management**
Push policies to all managed endpoints in just a few clicks

» **Full support**
Leverage the Continuum Network Operations Center for troubleshooting (level 1 and 2 support)

» **Designed to scale**
Scale your business profitably and efficiently

Additionally, Continuum partners get a free desktop license included with their agent.

Benefits of Using Webroot with Continuum

Cloud-based architecture
Provides fully remote access without on-premises hardware

Continuum integration
Unifies and further improves ease of administration

Highly effective protection
Minimizes support/help desk calls

Automated roll-back remediation
Renders reimaging virtually unnecessary

Zero definitions or signature updates
Always up to date to ensure protection and compliance

Low device footprint
Improves system performance

Intuitive, highly automated operational management
Reduces administration

Installs in under 5 seconds[†]
Deploys with ease

No-conflict agent
Enables secure solution migration or layered protection

Powerful remote agent command toolset
Offers full control over individual or groups of endpoints

Hierarchical policies and enforcement
Provides global site, user group, and user level administration

About Webroot
