

Why Webroot is #1 with IT Pros

When it comes to security for endpoints, networks, and end users, IT pros have lots of choices—free and paid. But they consistently rank Webroot at the top and give Webroot products the highest ratings.¹ Why is Webroot #1 with IT pros?

#1

“Excellent AV tool. Easy setup, good cloud management, decent price, great reporting, and extremely effective protection.”

— Zimm001, IT pro

#1

Webroot topped the Spiceworks Best Antivirus SpiceList **3 years in a row**.²

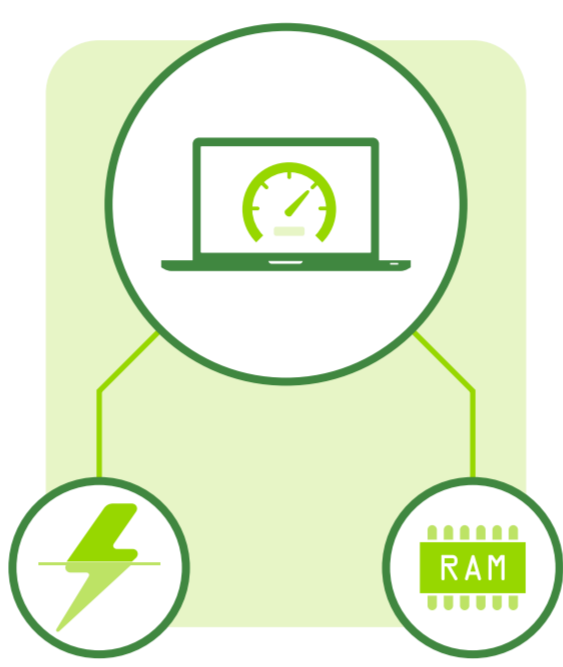

Smarter Cybersecurity® Solutions

IT pros value cloud-based, next-gen Webroot® technology because of its:

Efficacy at stopping ransomware, phishing, and other threats through machine learning-based threat intelligence, AI, behavioral heuristics, journaling, and auto-remediation

Minimal impact on system performance and user productivity, thanks to a lightweight agent, two-minute scanning, and low memory demands

Ease of management through a single, web-based console with powerful agent commands, as well as RMM integrations

#1

“Webroot is the best managed antivirus product right now. The web portal makes it easy to manage installs and deal with threats. The antivirus itself is lightweight, but still effective. Also the price is right!”

— info890, IT pro

#1

Security resources you can count on

Webroot equips IT pros with comprehensive product support and security resources:

Free product support through online trouble ticketing, phone support in three global time zones, an online Webroot community, user guides and videos, and social networks including Spiceworks

Security awareness training that teaches employees to spot and avoid cyberattacks and provides a phishing simulator to test user preparedness

Cybersecurity trend reporting, including quarterly threat trend reports, cyber threat webinars, and major research publications such as the [2018 Webroot Threat Report](#)

#1

“I’ve worked with a lot of AV products and vendors and Webroot is the one we’ve remained confident in as a product and happy with as a vendor. Good detection, good management, and good support.”

— Scott Alan Miller, IT pro

#1

Nearly 31 million malicious and suspicious mobile apps were available during 2017, a 3x increase over 2016.

— 2018 Webroot Threat Report³

A major presence in Spiceworks

Webroot has embraced the IT pros in the Spiceworks Community in a major way by:

Maintaining a vendor page that provides **product support and security resources** to over 173,000 followers

Providing **five green guys and gals** who represent product engineering, customer service, and more

Offering **free trials** of numerous products and services

Playing an **active role at SpiceWorld**, serving as a conference sponsor, session presenter, and supplier of serious swag

#1

“Easy set up and simple to use. This is a great product.”

— Angiearteaga, IT pro

#1

Webroot celebrates 6 years of collaboration

Webroot has been active in the Spiceworks Community since 2012, building a loyal customer base one IT pro at a time. Want to learn more?
